

To,
The Editors,
Journal of Physics : Condensed Matter

20th April, 2023

Dear Philip Semple,

We are writing to submit the revised manuscript titled “Frustration shapes multi-channel Kondo physics: a star graph perspective” (Manuscript reference: JPCM-121631) for your consideration towards publication in Journal of Physics : Condensed Matter. We are also submitting our responses to the comments and suggestions offered by the two referees. While the first referee was mostly satisfied with the work, the second referee suggested that we provide a list of new results obtained by us. To address this, we have improved the **Summary of results** subsection in the introduction and stated very clearly what new results have been obtained by us.

Details of all changes to the manuscript are laid out in the document that has responses to the referees. We have also provided a pdf document named “Complete Document for Review (PDF Only)” that has the complete revised manuscript with modifications marked in blue colour. We request you, therefore, to kindly consider accepting our work for publication.

Yours sincerely,

Siddhartha Patra, Abhirup Mukherjee, Anirban Mukherjee,
N. S. Vidhyadhiraja, A. Taraphder, Siddhartha Lal
